

UV INSTRUMENTS

EIT is now EIT2.0

SAME OWNERSHIP & MANAGEMENT TEAM
WITH AN INCREASED CUSTOMER FOCUS

With over 46 years in the technology arena, EIT has learned that change is necessary to remain viable. EIT2.0 LLC dba as EIT LLC is the latest evolution and was formed in 2022 under the same ownership and key management team. The change will allow the development of our proprietary UV measurement products along with our Avionics products with increased customer focus.

EIT was established in 1977 as an engineering, design & contract electronic manufacturing services (EMS) provider for medical, industrial, analytical instrument, telecommunications and aerospace customers.

EIT's UV measurement and process control instruments including radiometers and on-line measurement systems have been sold since 1986 and are recognized as the leader for industrial curing. EIT has sold over 103,000 industrial UV measurement solutions to measure UV broadband, LED and germicidal sources in 53 countries. Collectively, the EIT team holds over 50 patents, many related to UV measurement .

EIT2.0 has relocated to a new facility that houses our manufacturing, sales, support, service, engineering, and design groups. Contact information for the new facility is:

EIT2.0 LLC
